1. Lake Accotink Park Master Plan Revision Update – Information

Gayle Hooper provided a project update for the ongoing Lake Accotink Park Master Plan Revision, briefly covering two years of community meetings, public outreach, research, and coordination. The primary focus of discussion was the lake's long-standing sediment problem and the five alternatives being considered to address the issue. Information on each alternative included the cost of implementation and ongoing management as well as an overview of the recreational, environmental, and neighborhood impacts. Community input is being accepted relative to the preferred alternative. Separate from the Park Authority's master plan process, Supervisor Cook will be doing additional outreach regarding the disposition of the lake.

The meeting adjourned at 7:30 p.m.
